Hi Reina,

No, there should be none now. I did extensive sampling in the UOQ Area (old Area C Housing off Bailey Ave) and all samples came back negative. I would also apply those same sample results to the current TLF's in that same area. Let me know if you need anything else.

Thanks,
Michele

Subject: Military Family Housing

Are there any military family housing units positive or older homes remaining that could be positive for ACM or LBP? Thanks.
